Seminar

DIAGNOSING CANCER WITH BIOINFORMATICS

Tuesday, 22 February, 2005 at 12 Noon

Auditorium
Institute of Biochemistry and Biotechnology
University of the Punjab, Quaid-e-Azam (New) Campus, Lahore

Dr. Iqbal Gondal
from
Monash University, Australia

Studies of the DNA sequence are paving the ways to diagnose diseases at much early stages leading to possible cures of cancer. Presence of mutated genes could be considered a risk for undesired production of proteins resulting in diseases like cancer. This seminar will highlight the biology of the microarrays, different classification techniques to diagnose cancer and the necessary tools to increase the accuracy of diagnosis.
